

The University thinks that the visit of Sejer Andersen opens a lot of possibilities to create contacts between Kamchatka and Denmark and the University would like to stimulate exchanges of professors and students as well as the historic faculty would like to participate in the actual research to examine closely the life of Vitus Bering, his descendants and the society in which he lived. We are very happy that we introduced Sejer Andersen to the Minister of Culture and we understand that they discussed possibilities for theatre exchanges. The Dean of the historic faculty expressed a wish to see Sejer Andersen perform next year in Petropavlovsk.

We highly recommend Sejer Andersen as a specialist owing a great experience, a professional and a master of his craft.
